

RTEC will be closed
February 19th

Introducing Denise Kneiff

By the time you are reading this I will have 8 days at RTEC under my belt. It is going by fast. Cliff notes version of how I ended up at RTEC: I grew up on a dairy farm in Wisconsin, graduated with a Bachelor's degree in Agricultural Engineering Technology from University of Wisconsin- River Falls and then spent the next 20+ years working in various roles in Manufacturing. My career has included working for Cargill Animal Nutrition, Prince Manufacturing, and Astec Industries. The ability to see a concept go from drawings, to a completed product, and then seeing it being used continues to be awe-inspiring for me. I look forward to introducing more people to the world of manufacturing and developing those that are already in their roles as the General Manager here at RTEC.

Outside of work, my family keeps me on my toes and fills the remainder of my time. My husband Greg, is an electrician and runs his own business. Our sons Jacob, Alex, and James keep our calendars full with their school activities, jobs, and normal young adult/teenage lives. We have a small acreage on the outskirts of Martinsburg, Nebraska where we all enjoy hunting, fishing, camping, gardening, and a variety of other outdoor activities.

I am excited to be leading the team at RTEC as we start into the new year. Watch for updates as we start to fill our schedule with courses. I look forward to getting to know all of you and working with everyone in Yankton. Have a great month!

X *Excel classes coming in March and/or April. Watch the website and newsletters for more updates!!!*

LEAN 101

RTEC is working on a **LEAN 101** class for manufacturing:

If you or your company are interested please send Denise an email (dkneiff@rtcedu.org) for more details.
